EDUCATION

Bachelors of Engineering in Computer Science
VIT Bhopal University, Bhopal, Madhya Pradesh

September 2021-July 2025
CGPA:8.26/10

CORE TECHNICAL SKILLS

Programming Languages: C++, HTML/CSS, SQL, JavaScript, TypeScript.

Frame Works/Tools: Git, MongoDB, React.js, Express.js, Node.js, VS Code, Angular.js, React Native, Flutter.

Certifications: Android App Development, MERN Full Stack Internship Program.

PROJECTS

AI Story Enhancer

February 2026

- Developed an AI-powered web application that enhances user-written stories by refining tone, structure, and creativity based on selected genre and language preferences.
- Built a responsive frontend with React.js and integrated RESTful APIs using Node.js and Express.js to process user inputs and generate enhanced content through AI API integration. Ensured smooth deployment with proper environment configuration.

Technology Used: React.js, Node.js, Express.js, JavaScript, REST APIs.

Songify – Music Streaming Mobile Application

January 2026

- Built a cross-platform music streaming app using React Native and Expo, supporting audio playback with play/pause, seek, shuffle, repeat, and volume controls via Expo AV.
- Implemented favourites management using React Context API and Async Storage, enabling persistent liked songs grouped as a Favourites album in the library.
- Designed a modular navigation structure with Expo Router and managed playback state using React Hooks for efficient UI updates.

Technology Used: React Native, Expo, TypeScript, Context API, Async Storage, Expo AV.

Savrajya

November 2024

- Designed and implemented a feature-rich platform enabling users to create, publish, and manage blogs and chapter-wise stories, fostering greater user engagement.
- Enhanced reader interaction with a robust commenting and review system, encouraging more feedback submissions. Optimized the platform for scalability and performance with high reliability.

Technology Used: React.js, Node.js, MongoDB, Express.

Chhanv Well-Fare

November 2022

- Designed a user-friendly website to promote donations and volunteering, making it easier for users to support orphans, the elderly, and other vulnerable groups. The platform encouraged active participation and streamlined the contribution process.
- Integrated QR codes for donations and efficiently managed drives, significantly boosting contributions and enhancing overall user engagement.

Technology Used: HTML, CSS, PHP (MySQL).

WORK EXPERIENCE

ASCENDION ENGINEERING PVT. LTD | Associate Software Engineer

July 2025-Current

- Internal Project – AAVA (AI Workflow Platform) | Frontend Developer:**
 - Developed and maintained reusable UI components using **React** for AAVA, an AI platform that enables users to create AI agents and workflow automations.
 - Built modular, responsive, and accessible frontend components to ensure a consistent user experience across the platform.
- Client Project – HP | Frontend Developer:**
 - Developing responsive and user-centric interfaces for enterprise applications using **Angular**.
 - Implementing reusable frontend components and integrating UI with backend services.
 - Collaborating with cross-functional teams, including designers, backend engineers, and stakeholders, to deliver scalable and high-performance web applications.

- **Internal Project – AAVA Data Studios | Frontend Developer:**
 - Owned the **end-to-end frontend development of Data Studios using Angular**, an AAVA module supporting data-driven workflows and user interactions.
 - Developed and maintained the complete frontend interface, delivering responsive, intuitive, and reliable user experiences across the platform.
 - Implemented and maintained unit testing across the Data Studios frontend and backend, ensuring functional correctness, code reliability, and stable feature delivery.
 - Investigated and resolved CI/CD pipeline issues, improving the reliability of build, test, and deployment workflows.
 - Identified and remediated Checkmarx security vulnerabilities, contributing to secure and production-ready application delivery.

EXTRA CURRICULARS

- **Participations:** SIH 2023 (2023), Google Girl Hackathon (2024) and AMEX Hackathon (2024), Finalist in a College Hackathon.
- **Responsibilities:** Led content strategy and digital campaigns for technical and social-impact events.
- **Hobbies:** Literature Writing, Crochet, Roller Skating.
